

Dr. Neelesh Sharma delivered keynote speaker lecture in International Buffalo Symposium at Nepal

Dr. Neelesh Sharma, Assistant Professor (Senior Scale), Division of Veterinary Medicine, Faculty of Veterinary Science & A.H., SKUAST-Jammu has been delivered keynote speaker lecture on “**Buffalo mastitis in dairy production: Technological advances in understanding of mastitis**” in the thematic area of “Buffalo health” in the International Buffalo Symposium held on 15th-18th November, 2017 at Agriculture and Forestry University (AFU), Chitwan, Nepal in collaboration with Michigan State University (MSU), USA.

This mega event was participated by about 200 delegates from more than 10 countries; that included the lead authorities of AFU, MSU, Government of Nepal, NARC and World Buffalo Federation, Asian Buffalo Association, Universities and reputed research organizations nationally and internationally.

Dr Sharma strongly raised the economically important and serious problem of dairy animals that is **mastitis** in front of galaxy of scientists from different countries during a brain storming session and requested to the house for the establishment of “**Asian Mastitis Council**” in the line of “National Mastitis Council” in USA, for controlling this diseases in Asia. As we know that India stands at the first position in milk production but still we have challenges for the increasing the demand of milk and milk products and milk quality. Asia has significant contribution of dairy animals and milk production in the world. House was accepted his agenda and finally included in the symposium resolution/ recommendations.
